Subject: Production planning for November and December.

Dear Partners,

In view of the upsurge of the Covid-19 pandemic seen in many of the countries where Prado Cartolinas da Lousã, SA operates, we hope all the employees of our client organizations and their families are in good health and facing these challenging times with the desirable optimism.

On the PCL side, we have been intensifying all preventive measures as possible in an industrial realm, in order to mitigate the risks of contagion from Covid-19, safeguarding the health of our employees, which has allowed the activity to continue with a minimum of disruptions, service to the market and, consequently, the company's sustainability.

In November, we will start production on the 2nd which we estimate will last for three weeks, until the 22nd. In December we anticipate that production period will start on the 9th, for two weeks, until the 23rd.

In both months we will start production with white products, and then colours, producing those listed in the attached table.

We also inform, regarding some of the colours that we will now produce, the forecast of a new production (covering only those that were already manufactured in 1 or 2 cycles annually), so you can take this into account in interactions with the market.

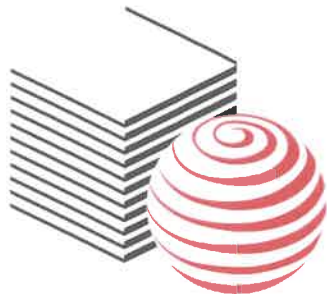

Naturally, in the cycles in which they will not be produced, we maintain the immediate availability of these products from stock.

Our commercial services are available to analyse any situation that does not fit within the current plan.

With best wishes for good health to all,

Best regards,

PRADO CARTOLINAS DA LOUSÃ, S.A.
